

# Company Fact Sheet

Established in 2004, Silver Wheaton has quickly positioned itself as the largest metals streaming company in the world. The company currently has thirteen silver purchase agreements and two precious metal agreements where, in exchange for an upfront payment, it has the right to purchase all or a portion of the silver production, at a low fixed cost, from high-quality mines located in politically stable regions. Forecast 2010 production, based upon the company's current agreements, is 22.2 million ounces of silver and 20,000 ounces of gold, for total production of 23.5 million silver equivalent ounces. By 2013, annual production is anticipated to increase significantly to approximately 38 million ounces of silver and 59,000 ounces of gold, for total production of over 40 million silver equivalent ounces. No ongoing capital expenditures are required to generate this growth and Silver Wheaton does not hedge its silver production.

Silver Wheaton's industry-leading growth profile is driven by a portfolio of world-class assets, including silver streams on Goldcorp's Peñasquito mine in Mexico and Barrick's Pascua-Lama project straddling the border of Chile and Argentina. The company's unique business model creates significant shareholder value by providing considerable leverage to increases in the silver price while reducing the downside risks faced by traditional mining companies. Silver Wheaton has an experienced management team with a strong track record of success and is well positioned for further growth.

## Investor Highlights

### Upside Potential

- Industry-leading growth
- Portfolio of world-class assets including silver streams on Goldcorp's Peñasquito mine and Barrick's Pascua-Lama project
- 100% unhedged, providing pure upside to increases in the price of silver

### Downside Protection

- Low fixed operating costs
- No ongoing capital expenditures
- No ongoing exploration costs

## Silver Streaming Explained

Silver stream agreements allow Silver Wheaton to purchase, in exchange for an up-front payment, the by-product silver production of a mine that it does not own or operate. The price it pays for future silver production, pre-determined in the agreements, is typically US\$3.90 per ounce with a small inflationary adjustment, which ensures costs are fixed. This allows Silver Wheaton to avoid variations in operating costs, reducing downside risk, while providing the upside of significant leverage to increases in the price of silver. As well, other than the initial up-front payment, Silver Wheaton does not contribute to future capital expenditures or exploration costs invested by the mine, yet benefits from the production and exploration growth that results from these expenditures. This often translates into significant value creation for our shareholders.

Silver Wheaton pursues acquisitions that are accretive to shareholders and low-risk in terms of asset quality and political jurisdiction. The company currently has 13 long-term silver purchase agreements and two long-term precious metal purchase agreements with nine operating partners around the globe. These agreements cover 14 operating mines and five development stage projects.

## Top 40 Silver Deposits in the World

Stake in 3 of the top 5 (and 9 of the top 40) silver deposits in the world.

## ● PEÑASQUITO - Mexico

In July 2007, Silver Wheaton entered into an agreement to purchase 25% of the silver produced from Goldcorp's Peñasquito mining operations in Mexico for the life of mine. Peñasquito is the second largest known silver deposit in the world and production from Peñasquito's milling operation commenced in the third quarter of 2009. Once at full production capacity, the mine is expected to average 28 million ounces of silver production annually for 22 years, of which Silver Wheaton is forecast to receive approximately seven million ounces of silver per annum.

## ● PASCUA-LAMA - Chile/Argentina

In September 2009, Silver Wheaton entered into an agreement to purchase 25% of the life of mine silver production from Barrick Gold's Pascua-Lama project, as well as 100% of the silver production from their Lagunas Norte, Pierina and Veladero mines until the end of 2013. Once in production, Pascua-Lama is forecast to be one of the largest and lowest cost gold mines in the world with an expected mine life in excess of 25 years. Silver Wheaton's 25% share of the estimated average annual silver production for the first five years, beginning in 2013, is nine million ounces.

## ● LUISMIN - Mexico

In October 2004, Silver Wheaton entered into an agreement with Goldcorp to purchase 100% of the silver from the Luismin operations consisting of the San Dimas, Los Filos and San Martin mines, for a period of 25 years. Principle among these is the San Dimas mine. San Dimas is a low-cost producer of gold and silver, has been in continuous production for well over 100 years, and has an estimated mine life in excess of 20 years. San Dimas currently produces over five million ounces of silver annually, and has the potential to increase production by more than 50%.

## ● YAULIYACU - Peru

In March 2006, Silver Wheaton entered into an agreement with Glencore International AG to purchase up to 4.75 million ounces of silver per year for a period of 20 years, based on the production from Glencore's Yauliyacu mining operations in Peru. The Yauliyacu mine is a low-cost underground zinc, lead and silver mine that has been in continuous operation for over 100 years. Silver Wheaton is expected to receive between three and 4.75 million ounces of silver annually.

## ● ZINKGRUVAN - Sweden

In December 2004, Silver Wheaton entered into an agreement to purchase 100% of the life of mine silver production from Lundin Mining's Zinkgruvan mining operations in Sweden. Zinkgruvan is a low cost zinc-lead-silver mine that has been in continuous production for more than 150 years. The mine is forecast to produce up to two million ounces of silver annually.

## ● MINTO - Canada

As part of the Silverstone Resources acquisition in May 2009, Silver Wheaton acquired the right to purchase 100% of the life of mine silver and gold production from Capstone Mining's Minto mine in Canada. Minto is a low-cost producer and one of the highest-grade open pit copper mines in the world. Based on the most recent mine plan, Silver Wheaton is forecast to receive over 200,000 ounces of silver and approximately 20,000 ounces of gold annually.

## ● COZAMIN - Mexico

As part of the Silverstone Resources acquisition in May 2009, Silver Wheaton acquired the right to purchase 100% of the silver production from Capstone Mining's Cozamin mine, until 2017. Cozamin is a high-grade, low-cost underground copper-silver-lead-zinc mine located in the state of Zacatecas, Mexico. The mine is forecast to produce approximately 1.5 million ounces of silver annually for the next several years.

## ● OTHER

Other silver purchase agreements and interests include life of mine silver production from the Aljustrel mine in Portugal owned by I'M SGPS, the Campo Morado mine in Mexico owned by Farallon Mining Ltd., the Keno Hill project in Canada owned by Alexco Resources Corp., the La Negra mine in Mexico 80% owned by Aurcana Corporation, the Mineral Park mine in the United States owned by Mercator Minerals Ltd., the Neves-Corvo mine in Portugal owned by Lundin Mining, the Rosemont project in Arizona owned by Augusta Resources, and the Stratoni mine in Greece owned by European Goldfields Ltd. In addition, Silver Wheaton has elected to convert its debenture with Pan American Silver Corp. into an agreement to acquire an amount equal to 12.5% of the life of mine silver production from the Loma de La Plata zone of the Navidad project in Argentina.

### Footnotes

(1) Cautionary Note Regarding Forward Looking Statements: The information contained herein contains "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and "forward-looking information" within the meaning of applicable Canadian securities legislation. Forward-looking statements, which are all statements other than statements of historical fact, include, but are not limited to, statements with respect to the future price of silver and gold, the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, reserve determination and reserve conversion rates. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Silver Wheaton to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: fluctuations in the price of silver and gold; the absence of control over mining operations from which Silver Wheaton purchases silver or gold and risks related to these mining operations including risks related to fluctuations in the price of the primary commodities mined at such operations, actual results of mining and exploration activities, economic and political risks of the jurisdictions in which the mining operations are located and changes in project parameters as plans continue to be refined; and differences in the interpretation or application of tax laws and regulations; as well as those factors discussed in the section entitled "Description of the Business - Risk Factors" in Silver Wheaton's Annual Information Form available on SEDAR at [www.sedar.com](http://www.sedar.com) and in Silver Wheaton's Form 40-F on file with the U.S. Securities and Exchange Commission in Washington, D.C. Forward-looking statements are based on assumptions management believes to be reasonable, including but not limited to: the continued operation of the mining operations from which Silver Wheaton purchases silver or gold, no material adverse change in the market price of commodities, that the mining operations will operate and the mining projects will be completed in accordance with their public statements and achieve their stated production outcomes, and such other assumptions and factors as set out herein. Although Silver Wheaton has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate. Accordingly, readers should not place undue reliance on forward-looking statements. Silver Wheaton does not undertake to update any forward-looking statements that are included or incorporated by reference herein, except in accordance with applicable securities laws.

(2) Cautionary Language Regarding Reserves and Resources: For further information on Mineral Reserves and Mineral Resources (including grades and tonnes) and on Silver Wheaton more generally, readers should refer to Silver Wheaton's Annual Information Form for the year ended December 31, 2008, and other continuous disclosure documents filed by Silver Wheaton since January 1, 2009, available on SEDAR at [www.sedar.com](http://www.sedar.com). Silver Wheaton's Mineral Reserves and Mineral Resources are subject to the qualifications and notes set forth therein. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability.

(3) Cautionary Note to United States Investors Concerning Estimates of Measured, Indicated and Inferred Resources: The information contained herein uses the terms "Measured", "Indicated" and "Inferred" Resources. United States investors are advised that while such terms are recognized and required by Canadian regulations, the United States Securities and Exchange Commission does not recognize them and expressly prohibits U.S. registered companies from including such terms in their filings with the SEC. "Inferred Mineral Resources" have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. United States investors are cautioned not to assume that all or any part of Measured or Indicated Mineral Resources will ever be converted into Mineral Reserves. United States investors are also cautioned not to assume that all or any part of an Inferred Mineral Resource exists, or is economically or legally mineable. United States investors are urged to consider closely the disclosure in Silver Wheaton's Form 40-F, a copy of which may be obtained from Silver Wheaton or from <http://www.sec.gov/edgar.shtml>.
